THE KEULAVATOR™

FRAME

SWEEPS

DISC HILLERS

SPIDER GANGS

3-Pt Keulavator™ Frame, Cat. 1 #51946* **\$279.99**

- 1 1/2" diameter x 15 1/2" long toolbars
- Accepts IHC-style wedge clamp & bolt
- Clamp assemblies can easily be adjusted for a min row width of 31" to a max row width 52"
- A 3-pt tractor attachment that can be customized to shape, ridge, bed & cultivate your garden.
- Accessories sold separately

*Additional \$12.00 out-of-box fee will be added to shipping charge

SIMPLE IN DESIGN, COMPLEX IN CAPABILITIES: THAT'S WHAT THE KEULAVATOR DELIVERS.

Agri Supply is proud to be a developer and sole retailer for this specialty product. It's perfect for: **Bedding, cultivating, ridging, & shaping your rows... in your garden or on your farm.**

Sweep Attachments

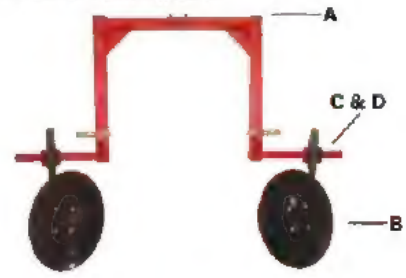

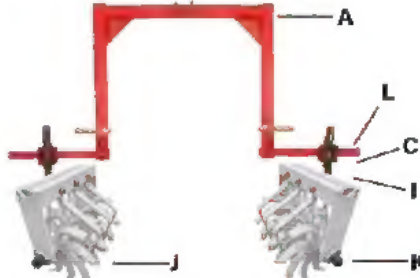

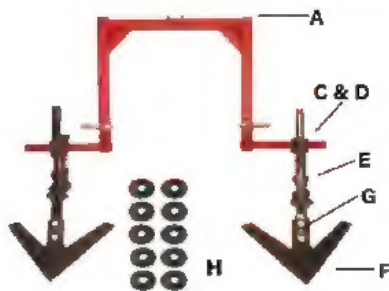

This heat treated row sweep will help you control weeds in your center rows. It has a 16 inch width and is 1/4" thick. This tillage sweep has a 54° stem angle and has been heat treated for added strength and durability.

Spider Gang Attachments

Till in weeds and protect your crops from being choked out. Loosen the soil, turn under weeds, and promote water infiltration. Each assembly includes four 14 1/2" spiders and 3 scrapers to cut weeds and break up dirt clods.

Disc Hiller Attachments

An easy & economical way for hilling in prepared soil. They can be used in place of plows to make up rows, and work even better, because plows can get stuck & kick dirt up covering your plants where hillers will roll over objects & not get hung up.

Center Hole

Measure the width of the disc axle.

Diameter

Lay blade flat with the cutting edges up. The distance from the outside edge to the outside edge is the diameter.

Concavity

Refers to the depth of the curvature of the blade. Lay the blade on a flat surface with the cutting edges down. Measure through the center hole from the flat surface to the inside edge of the blade center.

Thickness

Refers to the thickness of the metal at the axle hole. This can be referenced in millimeters (mm) or in gauge (inches).
